

## CASTLE HOT SPRINGS OHV RECREATION AREA

---

**Agency:** BLM Hassayampa FO  
**Grant Writer:** AZ Off Highway Vehicle Coalition  
**Grants:** #571010 (2010), #57012 (2010)

### **Project Description:**

The old landing strip is a low point in the area for drainage. This causes water to pond in entry area off of main road (Cow Creek). This project will repair/construct a raised road bed to allow water to drain from road bed.

A fence line will also be added to each side of the road to keep traffic on new road bed. One 41inch layer of 2 ½ inch Rip Rap will be laid and compacted, with an additional layer of screened ¾ inch road bed rock on top. This should address both the soft soil and dust issues on this entry road. Additional trail/route signs will be added to show users new access road. Additional fencing will also be installed along a ½ mile section of Cow Creek road.
